Profile

Aspiring Back-End Developer with strong expertise in building scalable and high-performance web applications using **Node.js** and **Express.js**. Passionate about **Machine Learning** and **Artificial Intelligence**, with hands-on experience exploring modern AI tools such as **LangChain**, **LangGraph**, **LangSmith** and **vector databases** to build intelligent, real-world applications.

Technical Skills

Language : Python , Javascript

Backend: Django, Django Rest Framework, Express.js, Node.js

Database: MongoDB, MySQL, Chroma

Tools: Git, GitHub, VsCode, Cloudinary, Postman, JWT , Djoser, Docker

Machine Learning & AI: Numpy, Pandas, matplotlib, Scikit-learn, Tensorflow, Langchain, LangGraph, LangSmith, Hugging Face

Projects

Movie Recommendation System [GitHub](#) [Preview](#)

- Built an interactive Movie Recommendation System using Streamlit.
- Allows users to select a movie from a dropdown and get top 5 similar movie recommendations.
- Displays movie posters dynamically fetched from the TMDB API.
- Made API calls with Requests to fetch movie data and images.

CookBot [GitHub](#) [Preview](#)

- Developed an interactive web app that generates complete recipes based on user-provided ingredients using LangChain and Hugging Face LLMs.
- Integrated a chat-based interface for user input and recipe generation.
- The structured recipe output includes the recipe title, ingredients with quantities, step-by-step cooking instructions, and optional tips and variations.
- Powered by Llama 3.1 8B Instruct for recipe generation.
- Adapts recipes to regional preferences (e.g., Nepali, vegetarian, quick meals).

Lang-Bot [GitHub](#)

- Built a modular backend using FastAPI, LangChain, and LangGraph for scalable and maintainable AI chatbot development.
- Implemented Retrieval-Augmented Generation (RAG) with document upload, semantic search, and vector embeddings for document-based question answering.
- Developed agent-based workflows with intelligent tool calling to provide real-time weather and stock information.
- Designed high-performance asynchronous REST APIs with conversation memory and interactive Swagger documentation for efficient API development and testing.

EDUCATION

Pashchimanchal Campus (WRC)

04/2021 - Present

Bachelor's Degree in Computer Engineering

Sagamatha Higher Secondary School

2019 - 2021

Higher Secondary Education (3.36 GPA)
